

RESOLUTION NO. 220184

JAN 31 1978

BE IT RESOLVED, by the Council of The City of San Diego, that pursuant to California Public Resources Code, Section 21081, the following findings are made with respect to the environmental impacts identified in Environmental Impact Report No. 75-10-27C:

"Noise and visual impacts would be mitigated by constructing the berm and noise would be reduced by implementing the enumerated operating procedures. In a noise study conducted by the City's Noise Abatement and Control Office, it was concluded that . . . a continuous 30-foot high earthen barrier parallel to the western property line, dropping to 20 feet on the northern barrier and continuing to the east beyond Carver Elementary School, will attenuate (calculated) noise levels in compliance with all known standards in the United States. Furthermore, the use of one earth mover and noise control operations should preclude the occurrence of distracting or intrusionary landfill noise. To insure that operational noise does not exceed the levels predicted, this office will conduct periodic noise measurements in the neighborhood during the fill operation. Additional noise control techniques would be recommended if indicated. Construction of the berm would mitigate the auditory and visual impact otherwise created by the operation of the landfill."

APPROVED: JOHN W. WITT, City Attorney
