

RESOLUTION NUMBER R- ~~283765~~

ADOPTED ON APR 26 1994

BE IT RESOLVED, by the Council of The City of San Diego, that the Council hereby approves Mayor Susan Golding's alternative for a preserve for the Multiple Species Conservation Program ("MSCP"), and establishes the following criteria for the creation of the preserve:

1. Habitat acreage of 155,000 to 165,000 with a cost of \$450-650 million.
2. Preserving 70-80% of the biological core areas and 50-60% of the corridors.
3. Protecting 41 priority species and beneficially affecting 59 total species.

BE IT FURTHER RESOLVED, that the San Diego City Council hereby adopts the following process for achieving the criteria:

1. Draw hard lines around a proposed preserve system within The City of San Diego.
2. Use the biological cores and linkages map, a copy of which is on file in the office of the City Clerk as Document No. ~~R-283765~~ as a reference.
3. Start with all land shown on the Public lands Alternative Map, a copy of which is on file in the office of the City Clerk as Document No. ~~R-283726-0~~, which includes all public and privately dedicated habitat lands and linkages.
4. Include all lands shown as open space in updated or existing community, general plans and proposed project plans.

5. Add the habitat required for the protection of all Federal and State listed species, species proposed for listing and, category 1 Candidate species.

6. Provide for contiguity and configuration through the application of specific sufficiency standards as approved by the City Council.

7. Keep the acquired land at a minimum.

8. Save major concentrations of species in step 5 above and maximize restoration and enhancement of habitat to ensure the long term viability of those species.

9. Create a phasing plan with priorities for the acquisition of the habitat over time as funds become available with highest priority being the acquisition of coastal sage scrub habitat in private hands.

BE IT FURTHER RESOLVED, that the San Diego City Council hereby approves the following goals recommended by the City Manager:

- a. Preserve all priority species; Federal and State listed, proposed and category 1 Candidate species.
- b. Protect the habitat of as many Category 2, Habitat Indicators and State Species of Concern as possible.
- c. Provide for sufficient contiguity and configuration of preserve.

BE IT FURTHER RESOLVED, that due to the Base Relocation and Closure ("BRAC") Commission's work, the City Council recognizes there may be a possible change of mission at the Miramar Naval

Air Station and that they therefore will have to take those potential changes into account and work with the Navy and Marines in developing a habitat preserve for the MSCP.

APPROVED: JOHN W. WITT, City Attorney
