ATTACHMENT NO. 1  
FINDINGS

SUBJECT IMPROVEMENTS:  
CONSTRUCTION OF PUBLIC IMPROVEMENTS FOR CHINESE CONSOLIDATED  
BENEVOLENT ASSOCIATION

I. FINDINGS OF BENEFIT

The subject improvements for which the Agency proposes to pay, will benefit the Centre City Redevelopment Project area or the immediate neighborhood in which the Project area is located in that:

- A. These improvements are within the Marina Sub Area of the Centre City Redevelopment Project, adjacent to undeveloped habitable properties.
- B. The improvements will enhance the area for the benefit of nearby users as well as new residents.
- C. The installation of public streetlights and new sidewalks will correct adverse health and safety conditions.
- D. These improvements will act as a catalyst providing an incentive for private investment in the rehabilitation of the area.

II. NO OTHER REASONABLE MEANS OF FINANCING

There are no other reasonable means available to the community for financing the subject improvements for which the Agency proposes to pay in that:

City of San Diego

- A. The Fiscal Year 1997 Budget for the City of San Diego increased 13.6%. The overall increase is largely attributable to changes in the Capital Improvement Program. However, a number of capital projects remain unfunded due to limited funds.
- B. The City's capital improvement budget is funded primarily with water and sewer fees, developer impact fees, grant funds, enterprise fund revenues, Facility Benefit Assessment funds, and Transnet funds. The Fiscal Year 1997 Capital Improvement Program Budget increased 40% from the Fiscal Year 1996 Budget.
- C. Consistent with signs of a recovering economy, most major tax revenue categories displayed signs of growth in Fiscal Year 1996. Moderate growth

is anticipated for most Fiscal Year 1997 major revenues. Property tax revenue is an exception with 0% growth anticipated. The economic growth rate for other major revenue categories are sales tax (4.8%) Transient Occupancy Tax (4.5%) and Motor Vehicle License fees 5.1%.

- D. The City's Fiscal Year 1997 Capital Improvements Budget (CIP) is embodied in Volume's IV and V of the City's Budget adopted on July 29, 1996. The Redevelopment Agency's Fiscal Year 1996-97 Program Budget was adopted on July 16, 1996. The CIP and the Agency's Budget were developed in accordance with City and Council Policy and each project activity was evaluated and incorporated in the respective budgets. Projects are funded based on need and the availability of appropriate funding sources. The City's CIP Budget totals \$374.9 million, an increase of \$108 million over FY 1996.
- E. Although sustained revenue growth is anticipated in Fiscal Years 1997 and 1998, the City is relying on some onetime revenue sources to provide higher levels of services than would otherwise be possible. Local Property Tax apportionments have been permanently diminished as a result of the Fiscal Year 1993 and 1994 state budget actions. Despite the state's ongoing economic recovery, the magnitude of the Property Tax loss - in excess of \$24 million each fiscal year - has required the use of onetime revenues.
- F. Maintaining and enhancing the services that the City provides to the citizens, residents and visitors is one of the City's primary core values. Although the weak economy and reductions in defense and aerospace spending have negatively impacted the City's revenues, the City has embarked on changing the traditional ways of conducting business and utilized three strategies to adhere to this core value. These strategies to maintain and enhance service levels by increasing revenues or reducing expenses are delineated in the 1997 Budget.

### III. ELIMINATION OF BLIGHTING CONDITIONS

The payment of funds toward the cost of the construction and installation of the subject improvements will assist in the elimination of one or more blighting conditions inside the Centre City Redevelopment Project area, and the proposed improvements are consistent with the Implementation Plan adopted for the Project pursuant to Health and Safety Code 33490, in that:

- A. The improvements will enhance the public right of way and replace inadequate or nonexistent public improvements. The proposed improvements will remove and replace these adverse conditions, upgrading to match the improvements on nearby streets.

- B. Streetlights and new sidewalks will further enhance the aesthetic quality of the street and the location of street light standards will be adjusted and added so as to increase the level of lighting along the public sidewalks.
- C. The improvements will act as a catalyst providing an incentive for private investment, thereby contributing to the removal of economic blight.
- D. The improvements provide improved pedestrian safety.
- E. "Installation of public improvements in this area is a means to contribute to blight removal by replacing inadequate public improvements" is included in the work program of the Implementation Plan adopted June 21, 1994 pursuant to Health and Safety Code 33490.
