

(R-99-918)

RESOLUTION NUMBER R- 291429

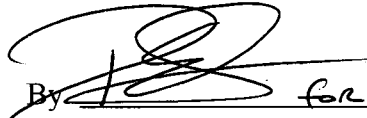

ADOPTED ON MAR 29 1999

BE IT RESOLVED, by the Council of The City of San Diego, that it is hereby certified that the information contained in ADDENDUM to MITIGATED NEGATIVE DECLARATION No. 89-1359, LDR File No. 98-1206, on file in the office of the City Clerk, has been completed in compliance with the California Environmental Quality Act of 1970 (California Public Resources Code section 21000 et seq.), as amended, and the State guidelines thereto (California Code of Regulations section 15000 et seq.), that the report reflects the independent judgment of The City of San Diego as Lead Agency and that the information contained in said report, together with any comments received during the public review process, has been reviewed and considered by this Council in connection with the approval of 65TH AND HERRICK WATER PUMP PLANT PROJECT.

BE IT FURTHER RESOLVED, that pursuant to California Public Resources Code section 21081.6, the Council hereby adopts the Mitigation Monitoring and Reporting Program, or alterations to implement the changes to the project as required by this body in order to mitigate or

avoid significant effects on the environment, a copy of which is attached hereto and incorporated herein by reference.

APPROVED: CASEY GWINN, City Attorney

ATTACHMENT A
MITIGATION, MONITORING, AND REPORTING PROGRAM
65TH & HERRICK PUMP PLANT

Dep No: 89-1359 (MND) and 98-1206 (addendum)

This Mitigation, Monitoring, and Reporting Program (MM&RP) is designed to ensure compliance with AB 3180 (1988) during implementation of mitigation measures. The program specifies what is to be monitored, how the monitoring shall be accomplished, the monitoring and reporting schedule, and completion requirements. The City of San Diego, Engineering and Capital Projects and Development Services Departments are jointly responsible for ensuring that this program is carried out.

The following measures comprise the Mitigation, Monitoring, and Reporting Program, and shall be stated in the contract documents and referenced on the construction plans for 65th & Herrick Pump Plant (Capital Improvement Project No. 73-229).

Cultural Resources

1. Prior to the start of construction, the Engineering and Capital Project Department Project Manager shall provide verification that a qualified archaeologist and/or an archaeological monitor experienced in historical archaeology have been retained to implement the archaeological monitoring program. This verification shall be in the form of a letter from the Project Manager to the Public Projects unit of the Environmental Analysis Section (EAS) of the City Development Services Department.

A qualified archaeologist is defined as an individual certified by the Society of Professional Archaeologists (SOPA). At least 200 hours of field experience for certification must have been obtained in southern California. Uncertified individuals who believe they meet the requirements for certification may submit evidence of their qualifications to the Development Services Department.

An archaeological monitor is defined as an individual who has expertise in the collection and salvage of cultural resources and who is working under the direction of a qualified archaeologist.

ALL PERSONS INVOLVED IN THE ARCHAEOLOGICAL MONITORING OF THIS PROJECT SHALL BE APPROVED BY EAS AT LEAST 30 DAYS PRIOR TO THE PRECONSTRUCTION MEETING. FOR QUESTIONS REGARDING THE ARCHAEOLOGICAL SITES, EAS SHALL BE CONTACTED.

2. The qualified archaeologist shall attend any preconstruction meetings to make comments and/or suggestions concerning the monitoring program and to discuss excavation plans with the excavation contractor. The requirements for archaeological monitoring shall be noted on the construction plans. The archaeologist's duties shall include monitoring, evaluation, analysis of collected materials, and preparation of a monitoring results report in conformance with the City's Guidelines for the Determination of the Significance of Archaeological Sites. These duties are defined as follows:

R-291429

a. Monitoring

The qualified archaeologist or archaeological monitor, experienced in historical archaeology, shall be present on-site during construction activity involving new excavation for the 24-inch diameter water pipeline (23471-D):

Station 0+14.78 to Station 1+49.2

b. Evaluation

In the event that cultural resources are discovered, the archaeologist shall have the authority to divert or temporarily halt ground disturbance operations in the area of discovery to allow evaluation of potentially significant cultural resources. THE ARCHAEOLOGIST SHALL CONTACT EAS AT THE TIME OF DISCOVERY. The significance of the discovered resources shall be determined by the archaeologist, in consultation with EAS. EAS must concur with the evaluation procedures to be performed before construction activities are allowed to resume. For significant cultural resources, a Research Design and Data Recovery Program shall be prepared and carried out to mitigate impacts. Any human bones of Native American origin shall be turned over to the appropriate Native American group for reburial.

c. Analysis

All collected cultural remains shall be cleaned, cataloged and permanently curated with an appropriate institution. All artifacts shall be analyzed to identify function and chronology as they relate to the history of the area. Faunal material shall be identified as to species. Specialty studies shall be completed as appropriate.

d. Report Preparation

A monitoring results report with appropriate graphics, which describes the results, analyses, and conclusions of the above program shall be prepared and submitted to EAS within three months following termination of the cultural resources program. Also, any sites or features encountered shall be recorded with the South Coastal Information Center at San Diego State University and with the San Diego Museum of Man.

THE PROJECT MANAGER SHALL NOTIFY EAS STAFF OF ANY PRECONSTRUCTION MEETING DATES AND OF THE START AND END OF CONSTRUCTION.

Implementation of the above measures will reduce impacts to cultural resources resulting from construction of this project to below a level of significance.
