

RESOLUTION NUMBER R- 295593

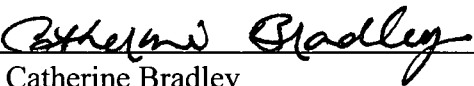

ADOPTED ON OCT 22 2001

BE IT RESOLVED, by the Council of the City of San Diego, that it is hereby certified that LDR No. 40-0259 (an Addendum to EIR No. 88-1459) on file in the office of the City Clerk, has been completed in compliance with the California Environmental Quality Act of 1970 (California Public Resources Code section 21000 et seq.), as amended, and the State guidelines thereto (California Code of Regulations section 15000 et seq.), that the Addendum reflects the independent judgment of the City of San Diego as Lead Agency and that the information contained in said final Addendum, together with any comments received during the public review process, has been reviewed and considered by this Council in connection with the approval of Earl Thomas Reservoir Replacement.

BE IT FURTHER RESOLVED, that pursuant to California Public Resources Code section 21081.6, the City Council adopts the Mitigation Monitoring and Reporting Program, or alterations to implement the changes to the project as required by this body in order to mitigate or avoid significant effects on the environment, copy of which is attached hereto as Exhibit A, and incorporated herein by reference.

BE IT FURTHER RESOLVED, that the City Clerk is directed to file a Notice of Determination [NOD] with the Clerk of the Board of Supervisors for the County of San Diego regarding the above project.

APPROVED: CASEY GWINN, City Attorney

## EXHIBIT A

The following measures comprise the Mitigation, Monitoring and Reporting Program and shall be stated in the contract documents and on the construction plans for the revised Alvarado Water Filtration Plant Expansion and Rehabilitation project. This document incorporates all mitigation measures from EIR No. 88-0459.

### Noise

1. Prior to approval of construction bid documents, the recommendations of the air quality technical report (Investigative Science and Engineering 2000) shall be incorporated into the construction plans and specifications to the satisfaction of the Environmental Review Manager (ERM) of the Land Development Review (LDR) Division. The siting of the rock crusher and other noise-generating equipment shall be clearly specified in the bid documents and shall be included on construction plans and specifications. The materials, height, and location of the required temporary noise barrier along Kiowa Drive shall be specified. Noise levels shall be monitored during construction by a qualified acoustical engineer, and noise barriers shall be adjusted as necessary during construction to ensure that noise levels are reduced as much as possible at the property lines of sensitive receptors.

### Paleontological Resources

2. Prior to the preconstruction meetings, the Water Department shall provide a letter of verification to the Environmental Analysis Section of the Planning and Development Review Department stating that a qualified paleontologist has been retained to implement the paleontological monitoring program during the excavation for the new Earl Thomas Reservoir and the staging pits for pipeline jacking activities. A qualified paleontologist is defined as an individual with a Ph.D. or MS degree in paleontology or geology who is a recognized expert in the application of paleontological procedures and techniques such as screen washing of materials and identification of fossil deposits.

A paleontological monitor may be retained to perform on-site monitoring in place of the qualified paleontologist. A paleontological monitor is defined as an individual who has experience in the collection and salvage of fossil materials and who is working under the supervision of a qualified paleontologist. The requirement for monitoring shall be noted on the grading plans.

3. All persons involved in the paleontological monitoring of this project shall be approved by ERM at least 30 days prior to the preconstruction meeting.

R-295593

4. The qualified paleontologist or paleontological monitor shall attend any preconstruction/pregrading meetings to consult with City staff and the excavation contractor. The paleontologist's duties shall include monitoring, salvaging, preparation of collected materials for storage at a scientific institution that houses paleontological collections, and preparation of a monitoring results report.
5. The paleontologist or paleontological monitor shall be on-site part-time during excavation into previously undisturbed formations. The monitoring time may be decreased at the discretion of the paleontologist in consultation with LDR.
6. If fossils are encountered, the paleontologist shall have the authority to divert or temporarily halt construction activities in the area of discovery to allow recovery of fossil remains.
7. The paleontologist shall contact LDR at the time of discovery. LDR must concur with the salvaging methods before construction activities are allowed to resume.
8. The qualified paleontologist shall be responsible for preparation of fossils to a point of identification as defined in the City of San Diego Paleontological Guidelines, and submittal of a letter of acceptance from a local qualified curation facility. The paleontologist shall record any discovered fossil sites at the San Diego Natural History Museum.
9. The qualified paleontologist shall be responsible for the preparation of a monitoring results report with appropriate graphics summarizing the results, analysis, and conclusions of the above program. The report shall be submitted to ERM within three months following the termination of the paleontological monitoring program, and prior to PDR's final inspection.
