A Semptra Energy utility®

Energy Upgrade California™ is a partnership of the California Energy Commission and the California Public Utilities Commission. This program is funded in part through the American Recovery and Reinvestment Act. This program is also funded in part by California utility customers and administered by San Diego Gas & Electric® under the auspices of the California Public Utilities Commission. Energy Upgrade California in San Diego County™ is local collaboration of San Diego County, San Diego Gas & Electric (SDG&E®) and California Center for Sustainable Energy® (CCSE).

This program may be modified or terminated without prior notice and is provided to qualified customers on a first-come, first-served basis until program funds are no longer available. Program partners and funders are not responsible for any goods or services selected by the customer. This program is supported in San Diego by the Department of Energy's Better Buildings Program funded by the American Recovery and Reinvestment Act.

Take a “Whole House” Approach

The sum is greater than its parts

Increasing your home’s efficiency isn’t just switching out light bulbs or buying new appliances. It’s approaching your home as a complete system. Heating, air conditioning, water and other systems can work together to more effectively help lower your bills. Energy Upgrade California connects you to the experts and resources you need to take a “whole house” approach.

Your Energy Upgrade California participating contractor can identify ways to save more energy and get more rebates for:

- Insulation
- Energy-efficient heating and air-conditioning systems
- Energy-efficient windows
- Cool roofs
- Whole house fans
- High-efficiency water heaters
- Energy-efficient hardwired interior and exterior lighting fixtures
- Other energy efficiency improvements that are permanent to your house

Why Upgrade Now?

Energy Upgrade California is a new program to help homeowners make energy-efficient upgrades to their homes.

Lower cost home upgrade investment—Rebates and incentives will make your home improvements more affordable!

Lower utility bills—Reducing the amount of energy and water used in your home can potentially make a big difference in monthly utility bills.

Increase comfort—A well-sealed and insulated home stays warmer in the winter and cooler in the summer.

Improve indoor air quality—Proper ventilation and non-toxic materials can reduce indoor air pollution.

Increase home value—Energy- and resource-efficient homes are becoming more valuable.

Reduce impact on the environment—Improving home energy efficiency is a way you can directly reduce greenhouse gas emissions that contribute to climate change.

Help your local economy—Creating jobs supports local businesses.
