

June 8, 2012

Council Member Lori Zapf, LU&H chair
202 C St
San Diego, CA 92101

Dear Council Member Zapf,

College View Estates Association strongly supports the formation of a citywide task force to address the issue of utility boxes and utilities undergrounding as recommended by the Community Planners Committee (June 6, 2012). We urge the Land Use and Housing Committee and the entire City Council to support this.

College View Estates is pleased that utilities here are scheduled to be put underground in the near future. At the same time, we are deeply concerned about the size and location of equipment we have seen in other communities. In many cases the placement of equipment almost makes us wonder if this is a good trade off. Clearly, with community input, this will be entirely beneficial.

Sincerely,

Rosary Nepi, President CVEA
