LU&H Committee:

Please support the Community Planners Committee's proposal to establish a task force, including community representatives, to plan under grounding utilities. While we do not like the forrest of wires on our street we are very concerned by the often insensitive placement of utility boxes. In particular we are angered by the material we have seen which says neighborhoods may not have input into the placement of utility boxes.

Thank you for your consideration,

Don and Ann Cottrell
