CITY MANAGER SUPPORTING INFORMATION:

The South Chollas Landfill is located south of College Grove Drive, between Chollas Lake Community Park and State Route 94. It was operated by the City of San Diego from 1951 through 1981. This resulted in the deposition of approximately 4.75 million tons of municipally generated solid waste. The City of San Diego is mandated by State Law to maintain the inactive landfill site for a period of at least 30 years. These activities include operation and maintenance of the landfill gas collection system, groundwater monitoring, compliance with National Pollutant Discharge Elimination System (storm water monitoring) standards, and overall site maintenance including differential settlement issues.

The site is inspected by the Local Enforcement Agency, under the authority of the California Integrated Waste Management Board, on a quarterly basis for compliance with State minimum standards for inactive landfills. One of these requirements is to maintain adequate protective cover (3 feet of soil) so in-place refuse does not become a public nuisance or contaminate ground and surface waters.

CITY MANAGER SUPPORTING INFORMATION: (Continued)

This project will stabilize the slopes along Highway 94 by installing a buttress key at the base of the slope and provide additional cover to the entire slope to ensure compliance with existing regulations. It will also provide a vegetative layer for plants to propagate and establish root systems to prevent soil erosion. The introduction of native plant species are part of the landscaping plan and will provide additional habitat for endangered wildlife species. Also included are drainage improvements which will remove the existing 25-year old underground corrugated metal storm drain pipes and replace them with above-grade pipes that can be easily inspected for settlement or leakage.

Funds from the Chollas Landfill Photovoltaic project are being transferred to this project for slope modification and stability. The Chollas Landfill Photovoltaic CIP is being de-appropriated because the photovoltaic project is being pursued as a no cost capital cost developer funded project.

FISCAL IMPACT:

Estimated construction cost for the South Chollas Landfill Slope Modification Project is \$1,900,500. Funds are available in CIP-32-020.0, South Chollas Landfill - Improvements, and CIP-32-023.0, Chollas Landfill Photovoltaic Project.

CITY MANAGER'S RECOMMENDATION:

Adopt the following resolution:

(R-2006-503)

Authorizing the City Manager to execute, for and on behalf of the City, an amendment to the As-Needed Agreement with Laguna Mountain Environmental, Inc. for professional archaeological monitoring services, dated June 3, 2005 (Agreement), increasing the maximum contract amount from \$250,000 to \$650,000, as specified in the amendment;

Authorizing the City Auditor and Comptroller to appropriate and expend an amount not to exceed \$400,000 from CIP-37-033.8, Consultant Review for Various Underground Projects, Fund 30100, Undergrounding Surcharge Fund, for the purpose of executing the aforementioned amendment to the Agreement, provided that the City Auditor and Comptroller first furnishes a certificate demonstrating funds are available;

CITY MANAGER SUPPORTING INFORMATION:

In June 2005, after a competitive interview process for an As-needed archaeological monitoring consultant for the Utilities Undergrounding Program, the firm Laguna Mountain was awarded a contract not to exceed \$250,000. Prior to that time archaeological needs were contracted out on a project by project basis.

* ITEM-103: (Continued)

CITY MANAGER SUPPORTING INFORMATION: (Continued)

The As-needed contracting serves to streamline the archaeological monitoring needs of the Utilities Undergrounding Program. However, two recent projects have involved major archaeological finds and have required extensive unanticipated mitigation costs that will cause the existing contract to reach its maximum amount near the end of calendar year 2005.

In order to meet the immediate archaeological monitoring and mitigation needs of the program, it is most efficient to amend the existing contract. This will provide for archaeological monitoring for 5 major undergrounding projects that will begin in 2006 and continue into 2007.

FISCAL IMP ACT:

Funds in an amount not to exceed \$400,000 are available in the Undergrounding Surcharge Fund No. 30100 for this agreement.

CITY MANAGER SUPPORTING INFORMATION:

The Ocean Beach Park and Recreation Center playground is located in the community of Ocean Beach at 4726 Santa Monica Avenue at the intersections of Santa Monica Avenue, Ebers Street and Saratoga Avenue. The playground was previously renovated in October 2003, to provide new play equipment and path of travel to meet current state and federal safety and accessibility requirements. In recent months the feral feline population in the neighborhood has increased significantly, creating a health and safety concern for the public and City staff. Although Park and Recreation staff has made a concerted effort to remove the feline feces on a daily basis, the problem continues to persist. The project will remove sand from the playground and replace it with poured-in-place rubberized resilient safety surfacing. Replacement of the sand with the rubberized resilient surfacing will eliminate the current health concerns, enhance accessibility within the playground and reduce maintenance costs.

In March 2002, California voters approved Proposition 40, the \$2.6 billion 2002 State Resources Bond "Safe Neighborhood Parks, Clean Water, Clean Air, and Coastal Protection Act of 2002 (bond)". On December 8, 2003, the Mayor and City Council approved Resolution R-298699, which included a distribution of the \$11,063,430 Per Capita/RZH Per Capita funds to each council district, with a portion of the funding set aside for projects with citywide and regional impact. On February 20, 2004 the City entered into an umbrella contract with the State of California for the 2002 Resources Bond Act Per Capita/RZH Per Capita Grant Program.

This action authorizes the City manager to apply for \$35,000, a portion of the 2002 Resources Bond (RZH per Capita) fund allocated to Council District #2. The funds will be used for excavation and removal of existing sand surface and installation of a new concrete base with a poured-in-place rubberized resilient surface.
