agendaitem: Agenda Item: # 333

comments: I have lived in University City and worked at General Atomic, Va Hospital/UCSD since 1972. We were promised the Regents Bridge since before we bought the house. Genesse has been a struggle many many time and when my son was young I pray for the traffic to be good so that I could pick him up from extended care at the Montessori school on Stressman UC on time. I have waited for so many years for the Bridge and I URGE you with all my heart to easy the pain that commuters like me are enduring every day and approve the design of the Regents Bridge. Sometime it takes me 45 min to drive 5 mile from work to my house. I have waited for 35 years and wonder if the bridge will ever be build in my lifetime!!! Thank you for your attention to the problem

comments: Please move forward with the design of the highly needed Regents Road Bridge. University City needs an alternative route to Genesee Avenue. The Rose Canyon is not a prestine area, as some people would like you to believe. There are sewer pipes and the train tracks running through it. Please vote yes on this issue.

Thanks.

comments: Please vote in favor of awarding consulting contracts because the majority of University City residents want the Regents Road Bridge.
There is a small group that is very vocal in opposition to the Bridge that constitutes a special interest group which live near Regents. This Bridge is for the entire community of San Diego and the majority of University City is for the Regents Road Bridge.

agendaitem: Item #333 on July 31, 2007

comments: Dear City Council: Please go forward with the design for the Regents Road Bridge. I have lived in this community for 25 years and am appalled that a handful of people have been allowed to deviously deny our community a crucial thoroughfare. I highly doubt that any environmental impact study would find the construction of a bridge any more harmful than 50 trains going through the canyon on a daily basis!

I am extremely concerned about my family's safety in case of a fire or medical emergency. I have been stranded on Genesee Avenue in the afternoon and watched ambulances try to get through the traffic. Has anyone died yet because their response time is greatly diminished? Also, in this area that is so full of dry canyons, if there's a fire and the fire department can't get to my house in a timely manner, I believe that an investigation about our traffic issues in UC would be warranted.

Developers have over-developed University City and the building continues, yet there has been absolutely NO relief whatsoever traffic-wise. This is INSANE! You voted for the bridge last year. It's now once again being held up by a "nuisance" environmental lawsuit. It's time to finally act responsibly. Please go forward with getting the design ready so we can finally, finally get our bridge! Anything else is, in my opinion, grossly irresponsible.

agendaitem: agenda item#333 meeting date July 31,2007

comments: We ask the council to go foreword with the design of the Regents Road bridge. We have waited a year for this very important matter. Our safty is involved if you have ever tried to nagivate the traffic on Genesee during traffic hours you know the situation. Emergency vehicles would not be able to reach us and being a senior citizen this is important to us. It would also save time and gas for our trips to the La Jolla Village Square area.

Thank you,

comments: I would very much like you to go ahead with the design of the Regents Road Bridge.

As a resident of University City for my whole life (born 1972), I feel that this bridge is necessary for easing congestion on Genessee, as well as protecting the safety of the citizens of UC. Both my husband & my father commute to Sorrento Valley via bicycles several days a week. I can't tell you how many times they have beeten the fire engines, sirens wailing, up Genessee during the evening rush hour traffic.

This bridge has been on the plans for this comunity since it was built. We need to go forward with the master plan and build this bridge!

Thanks,
Traci DeMarco

agendaitem: #333 on July 31, 2007

comments: On July 31st, please vote to approve the Regent's Road Bridge design contract. Our community desperately needs the bridge to ease traffic, shorten driving times (and gas!) and improve and provide a much needed evacuation route.

Objections by bridge opponents are officially based purely on weak, specious environmental concerns. Rose Canyon is a narrow park containing a sewer pipe and ice plant on its entire southern ridge - hardly the urban "Yellowstone" bridge opponents depict. A railroad track is its entire northern border. Over 50 trains daily traverse this purported environmental paradise. You are far more likely to see, hear a train during a visit to Rose Canyon than see (purported) rare fauna.

Existing bridges through nearby Marian Bear Memorial Park and Tecolote Canyon Natural Park have not diminished their public use or appreciation.

The Friends of Rose Canyon's web site actually presents a study showing only ~60 people per day use the park. Hundreds will use the bridge to shorten their drives, save gas and decrease traffic elsewhere in overdeveloped UC! Shortened fire, police and paramedic response times would also be a great benefit.

Bridge opponents are simply a NIMBY group. They just don't want the bridge in their back yard. I very much want this bridge in my back yard! I would use it often.

Please make the bridge a reality.

comments: Mr. Mayor and City Councilmembers:

Please move forward WITHOUT DELAY in contracting for a design for the Regents Road Bridge. This project has stalled for 20 years and should be completed as soon as possible. The City Council made the correct decision in voting 6-2 to build the bridge. The vast majority of University City homeowners support this decision. Please proceed without delay. Let's get the bridge built now !

comments: I URGE the Council to approve the City Government's request to proceed with the bridge design and project specific EIR for the very necessary and very long delayed Regent's Road Bridge. Our community has been denied for far too long this vital artery that every transportation study and every public safety study has always confirmed as being vital. I am also tired of seeing a few selfish individuals *cause delay to this project all these years simply because they want the continued use of our publicly owned streets for their own private driveways, all under the guise of trying to protect a canyon that is in and of itself a major transportation corridor.* Please - I urge you - to get on with this vital link in our community transportation network. Thank you.

P. M. Hekman

agendaitem: 333; 31 JULY, 2007

comments: DEAR MR MAYOR and City Council Members,
I have been a UC resident since 1985 and watched with interest as you have routinely approved every development in our area. Those votes provided you more tax money and more people to care for. Its now time to pay for the necessary bridges and roadways to protect those Citizens in the event of a fire or earthquake situation requiring multi evacuation routes. Please approve the contracts to design the Regent Road Bridge and needed EIR. It is you sworn duty to protect the public and we are clearly at risk without added routes to evacuate the area with the density and number of hi rise buildings that pepper our skyline. This has gone on far too long and you should be considered neligent, if you continue to not provide for the public's SAFETY!
Thank You for your support.
John R. Quesenberry

agendaitem: Item # 333 Meeting Date July 31, 2007

comments: Please approve design action for the Regents Road bridge, with some access to the park for the average citizen, who does not have private property abutting the park!

The population of UC is getting older and emergency vehicle access from Regents road is needed.

Very few UC residents go down into this canyon, the most underutilized piece of city property in existence. I almost never see any one parked in the approximately 6 available parking spots (end of Regents at Governor) for the whole canyon. The Genesee entrances can park a car or two for the volunteers with permission, the public has to park on the High School property (when allowed) or walk about a mile on Genesee. There are several other available entrances for locals on the south rim, most exceed the safe slope limits and probably should be fenced to limit city liability.

The entire North UC area is cut off and cannot use the main central canyon now, except for using the dirt utility road north and parallel to the tracks as a dog and jogging path. There are only two legal RR Track crossings, one up on the Genesee bridge and one at Balboa. Crossing the tracks anywhere else is illegal and dangerous. This means the large apartment/condo areas in north UC effectively have no access to this natural park, and the people in south UC have a hazardous trail from the end of Regents.

There will be no harm to the canyon, the bridge is scheduled for an old north-south bulldozer track, the native trees and grasses are well away from the bridge site. The entire canyon is an old farm, old Railroad grade, and sewer routes.

There is a excellent nature park just south of UC (Marian Bear Park) with two access roads, two large parking lots, and two BATHROOMS, with an almost year round creek, interpretive signs, Rangers, a volunteer corps, raptors, and other wildlife.

agendaitem: #333, July 31, 2007

comments: Just over a year ago I attended the City Council meeting that gave the green light to proceeding with the process of evaluating/building the Regents Road Bridge. I implore you to follow through by approving the contract for the design consultant for the said bridge. The congestion on Genesee gets worse with each year. I live at the west end of University City but feel that public safety should unite us all. I must travel on Genesee at all different hours when Regents Rd. would be a more direct route if it connected north & south UC.

Please move forward on this issue. Otherwise, it could again become a political football and divisive to the health of the University City community. And bring more gridlock to Genesee Ave. You were elected to be leaders for the good of all of San Diego. Here's your chance to put the city's safety first. Authorize the funds to hire a design consultant and move forward on the Regents Road Bridge project.

Respectfully yours,
Susan S. Betts

agendaitem: Item 333 July 31, 2007

comments: Please approve Item 333, July 31, 2007. It is frustrating that one year has passed without any progress since the Regents Rd. bridge was selected as the preferred alternative. Bridge opponents have successfully utilized delay tactics to prevent further action. Meanwhile the costs continue to escalate, building continues, we are in the midst of an extremely dangerous fire season and the community is left without a much needed alternate north south route and limited roadway improvements at critical intersections.

When our daughter and her neighbors in Scripps Ranch lost their homes in the Cedar Fire, our lives were forever changed. We also realize how fortunate we were the wind shifted and University City was spared. As the former Fire Chief stated last year, the fire would have burned through to the coast. Bridge opponents who wish to divert FBA funds to other uses to prevent the bridge from being built are not being realistic if they think disaster can't happen to them. Do not wait for disaster to strike. Please approve item 333 so the design contract can be awarded and phase 11 can get underway. It is long overdue. Thank you.

comments: Pleae go forward with designing the Regents Road bridge. When we purchased our home in University City 38 years ago. The Thomas Brothers Maps showed this bridge as a future improvement (it alo showed what is now the middle school & high school which were built). We have expected & waited a long time for this bridge.
Thanks for your consideration.

comments: Please vote approval for the Regents Road Bridge from funds started accumulating more than 30 years ago. I ask that you vote to approve the resolution to authorize the Mayor to go forward with a contract for the design consultant to do the final design for the Regents Road Bridge.
I was born in San Diego 82 years ago. My wife and I were narrowly missed by a spinning car that was hit on the overcrowded Genesee Blvd at Radcliff Court. It is an outrageous injustice that there is only one way to travel through University City. The Regents Road Bridge is needed.

comments: Dear City Council:

Please approve the docketed resolution to authorize funding for the design of the Regents Road Bridge. The City Council voted and approved the bridge alternative for addressing traffic issues in University City. Your vote today will continue to move this much-needed project moving forward. Thank you.

comments: We need to move forward on the Regents Street Bridge. I am very concerned about the traffic on Genesee at all times of the day. It needs to be relieved by building the bridge on Regents. We travel daily on Genesee to visit my Mother-in Law at the Hyatt and there are times we can get there in a timely fashion when the skilled nurses call us. I am also concerned that firefighters cannot reach residents turn peak hours. Traffic is only going increase with the addition of added housing at La Jolla Village Rd and 805 and the redesign of the Westfield shopping center. Support want the residences need.

agendaitem: 333 Vote to build the Regents Road Bridge

comments: We moved into our house in 1972
We bought the house in 1978 because we we assured there
would be a high school only the youngest was a student
We have been told that a bridge would be built. The number of elderly people living in this area if some
need fire or ambulance between 7am&9am &4pm&6PM it is impossible. There is a train that goes thru
the quiet
canyon several times during the day &night I really
hope you will see the need for the Regents rd Bridge
and vote yes on Tuesday. Thank you

comments: I respectfully ask the Council to approve going forward with the design for the Regents Road Bridge. I have lived in University City since 1974, I have worked at UCSD since 1998 and I have waited all this time for the city to unite North and South University City and create a 2nd north/south roadway-which we have needed for decades. We in South University City have very long response times for EMS and fire services during the rush hours and our community was once livable and drivable and has become moribund with traffic Monday through Friday during the AM/Pm rush hours. Thank you

comments:

Please, please start the Regents Road bridge !!! It was in the original plan for the University City and the people knew it before they bought their houses. We need the bridge for the safety of the community and for the traffic, but most of all for safety. A house near ours was on fire and the fire engine could not get here for twenty minutes. Meanwhile, a neighbor saved the house from being burned entirely because he kept the fire contained mostly in the garage where it started. Thank you for listening both sides. WE NEED THE BRIDGE

agendaitem: Item 333 July 31, 2007

comments: Please approve Item number 333 on July 31, 2007.
A whole year has passed since the Council voted 6-2 to approve the Regents Road Bridge. In the meantime the City has *addressed all the environmental issues in a lawsuit* and now it is time to move forward with the design of the bridge.

This community has waited for over 30 years for the bridge and because of delays the costs have sky-rocketed
WE NEED THAT BRIDGE NOW MORE THAN EVER. Please, no more delays.

Thank you very much.

Marcia Munn

agendaitem: Docket #333 of July 31, 2007

comments: I support the Staff Recommendations to proceed with the design of the Regents Road Bridge. It is one year since the Council correctly voted 6-2 to go forward with the Bridge alternative. The traffic and public safety conditions have worsened since then. Any further delays add significantly to construction costs and must be avoided. Please vote to proceed immediately with this design. Human lives are at stake. The claims of enormous environmental impact by a bridge are ridiculous. Can you think of any canyons, anywhere, that have ever been destroyed by a bridge?

comments: We urge you to approve funding to proceed with the design of the Regents Road bridge. We long time residents of University City have had a long wait for completion of Regents Road. It has been badly needed for many years to help relieve the north/south traffic congestion in this area.

comments: We request that the City Council vote to go forward with the design of the very necessary Regents Road Bridge. The reasons expressed by the Mayor, the Chief of Police Chief, and the Fire Chief almost one year ago are still valid. We need another north-south corridor into and out of University City. The birds, animals, and plant life in Rose Canyon have adapted to the bridge on Genesee between Governor Drive and Nobel Drive and to the commuter train that runs THROUGH the canyon 50 or more times daily. The Regents Road Bridge will CROSS OVER the canyon and the birds, animals, and plant life will adapt. Please do not waver from your previous very strong convictions that the Regents Road Bridge is necessary and overdue.

Thank you,
Gwen and Al Ickstadt

comments: I'm in favor of the Nth /Sth Corridor (the Regents RD Bridge) be "completed".
I'm new to UC and I've been here about 20 years. What I'm starting to understand is that people who have arrived in UC for a shorter period of time have always known of the Corridor, from full disclosure of Real Estate Agents. If not then they should sue the Agent.

There was a FIRE in the Canyon beside the Standley School (just lately) and three fire trucks arrived. The last truck to arrive was the UC truck because it was stuck in traffic on Genesee Ave. Now some people might be happy with that but I'm not.

Starting with the City Attorney and a selfish group of people who have opposed the project, like Debbie Knight, who is new to the area since 1998, the City Attorney also is new to the area and are stopping what they know is in the City approved plan.

There are a lot of people who have been expecting this bridge to be completed for a long time without new people to the area, it's about time someone stood up to Special interest groups unless of course they are being supported by them to run or hold their office.
