The District is located along both sides of El Cajon Boulevard beginning at eastside of 54th Street, east to the City limit line, adjacent to the City of La Mesa.

The purpose of the District is to fund regular maintenance of landscaped and hardscaped medians, landscaped right-of-way, adjacent slopes, sidewalks, gutters and brow ditches, and provide promotional activities within the District.

OTHER RECOMMENDATIONS:

Planning Commission on December 18, 2003, voted 6 – 0 to recommend approval; no opposition.

Ayes: Brown, Chase, Lettieri, Schultz, Ontai, Steele
Not present: Garcia

The Peninsula Community Planning Board on March 20, 2002, voted 13 - 0 - 1 to recommend approval of the project.

CITY MANAGER SUPPORTING INFORMATION:

The Anchorage Lane project proposes a rezone from CO-1-2 to RM-2-5, amendment to the Peninsula Community Plan and the Local Coastal Program, a tentative map, planned development permit and coastal development permit to allow for the construction of seven attached condominium town-home units.

Planning Commission Recommendation: The Planning Commission voted (6-0-0) to recommend unanimous approval of the project by consent at the Planning Commission public hearing of December 18, 2003.

Community Planning Group Recommendation: On March 20, 2002, the Peninsula Community Planning Board voted to recommend approval of the project by a vote of (13-0-1), with the condition that there be a maximum of seven (7) residential units. The project proposes seven residential units.

Water Quality Impact: The project proposes the construction of subsurface parking areas and the project is considered to be a priority project per the City Storm Water Standards. The project is required to implement site design, source control, and treatment control Best Management Practices (BMPs). Mitigation is incorporated into the project to ensure that adequate runoff filtration devices and/or materials will be incorporated into the project storm drains as permanent Best Management Practices (BMPs) in accordance with the final version of the City of San Diego Standard Urban Storm Water Mitigation Plan (SUSMP) and the Storm Water Standards, prior to the issuance of any construction permits. Implementation of the required water quality measures would reduce downstream water quality impacts to a level below significance.

Fiscal Impact: No cost to the City; all costs are recovered by a deposit account funded by the applicant.

Housing Impact Statement: Under the proposed community plan amendment, the project would provide seven (7) residential dwelling units at a density of 15-29 dwelling units per acre. No affordable units are proposed, however, the project is subject to the Affordable Housing Requirements of the City's Inclusionary Housing Ordinance (Chapter 14, Article 2, Division 13 of the Land Development Code).
