A small *lot subdivision* is the subdivision of multi-family zoned land, consistent with the *density* of the zone, for the construction of *single dwelling units*.

The intent is to encourage *development of single dwelling units* on small *lots* in order to provide a space-efficient and economical alternative to traditional *single dwelling unit development*. It is also the intent of these regulations to provide pedestrian-friendly *developments* that are consistent with the neighborhood character.

The following supplemental regulations apply to a Site Development Permit for a small *lot subdivision*.

- (a) A small *lot subdivision development* is permitted in the RM-1-1 through RM-3-8 (Residential Multiple Unit) Zones, and zones with comparable *density* in the Planned Districts regulated in Chapter 15.
- (b) A *dwelling unit* may have a maximum of three bedrooms.

- (c) A small *lot subdivision development* shall comply with the regulations in Table 143-03C and the supplemental regulations in this section.

- (c) The phasing program shall address the interim use of all areas where *development* will occur at a later date, including identification of the interim landscape and irrigation measures to be used to assure that portions of the site that may be graded or disturbed in the initial phase of project implementation but not be developed until a later phase, will be adequately mitigated.
- (d) Where construction is to be phased over a predetermined period, the phasing program shall be based on the projected population growth and availability of public facilities of the designated economic support area.
