Division 28: Service Worker Retention

*(“Service Worker Retention”
added 7-20-1998 by O-18552 N.S.)*

§22.2801 Purpose and Intent

- (a) The City awards many contracts to private firms to provide services to the City. The City also leases City Facilities to private firms to operate. These contractors and lessees may subcontract all or a portion of the services to others. At the conclusion of the term of a contract with the City or the expiration of a subcontract, the process of competition sometimes results in the award of the contract to a new or different contractor.
- (b) It is the experience of the City that the reasons for changing contractors do not necessarily include a need to replace workers presently performing services who already have useful knowledge about the workplace where the services are performed. Incumbent workers may have invaluable knowledge and experience with the work schedules, practices, patrons or clients that are particular to the City Facility or the location where the services are rendered. Replacing these workers could decrease efficiency and result in a disservice to the City, the City Facility and its citizens. Retaining existing service workers could avoid such problems, enhance continuity of service to citizens, and reduce the likelihood of labor disruptions or disputes at the City Facility or the location where the services are rendered.
- (c) It is unacceptable that contracting decisions involving the expenditure of City funds could result in the immediate loss of employment to workers on a City service contract who did not cause or contribute to the need to change contractors. It is the intent of the Council to provide these incumbent employees with a reasonable opportunity to obtain possible employment with the new contractor. It is the additional intent of the Council to avoid or minimize the disruption in services which may be caused by a change in contractors.
