(a) Environmental Document Distribution to the Public

The Planning Director shall make an environmental document available to the public by posting it to the City’s web page at least 14 calendar days prior to the earlier of the date that an advisory body makes a recommendation required by law or the date that the decision maker considers approval.

(b) Environmental Document Distribution to an Advisory Body

An advisory body required by law to make a recommendation on a project prior to a decision maker’s consideration of the project’s environmental document shall consider the environmental document in draft or final form. The draft or final environmental document shall be distributed to the advisory body 14 calendar days prior to the scheduled date of recommendation.
(c) Final Environmental Document Distribution to the Decision Maker

A decision maker required to consider approval of an environmental document shall consider the environmental document in final form. The final environmental document shall be distributed to the decision maker at least 14 calendar days prior to the scheduled date of decision.

(d) Failure to provide this 14 calendar day review period shall not be treated as a procedural defect and shall not preclude discretionary action on the project.

(e) Final Environmental Impact Report Distribution to Public Agencies

The Planning Director shall provide a final EIR to any public agency that commented on the draft consistent with CEQA.

(f) Comment on Final Environmental Document

The intent of distributing the final environmental document is to provide other public agencies, the public, and the decision makers the opportunity to review the final document prior to a decision being made on the project. No comments will be solicited and no written responses to comments on final environmental documents are required to be prepared.

§128.0311 Certification of an Environmental Document

(a) Except as provided in Section 128.0311(b) and (c), before approving a development permit or other discretionary action, the decision maker shall certify that:

(1) The final environmental document has been completed in compliance with CEQA and the State CEQA Guidelines; and

(2) The information contained in the final environmental document reflects the independent judgment of the City of San Diego as the Lead Agency and has been reviewed and considered by the decision maker before approving the project.

(b) If the environmental document has been previously certified because the decision is being heard on appeal, because the City is acting as a Responsible Agency, or because of reuse of a previously certified document, subsequent discretionary approvals on the same project shall not require recertification of any previously certified environmental document prepared in connection with the project. In this case, the decision maker need not certify as required by Section 128.0311(a)(1) but shall state the information contained in Section 128.0311(a)(2) for the record. Nothing in this section shall be deemed to preclude the Planning Director from reviewing the previously certified document to determine whether any supplemental information or document may be necessary.

(c) If the decision maker denies the project, the environmental document need not be certified.

§128.0312 Adoption of Findings and Statement of Overriding Considerations by the Decision Maker

Before approving a project for which the final EIR identifies one or more significant effects, the decision maker shall adopt the required findings in accordance with the State CEQA Guidelines, Section 15091. When the decision to approve the project allows the occurrence of significant effects that are identified in the final EIR but are not avoided or substantially mitigated, the decision maker shall make a statement of overriding considerations stating the specific reasons to support the decision based on the final EIR and other information in the record in accordance with the State CEQA Guidelines, Section 15093.

(a) Review of Further Information

If before making a decision, the decision maker determines that substantive additional information has been presented at the public hearing requiring further review, the decision maker may refer the information to the Planning Director for analysis, provided the referral does not adversely affect any time limits imposed by law.

(b) Preparation of Findings and Statement of Overriding Considerations

The findings and the statement of overriding considerations shall be in writing and shall be based on the entire record of proceedings.

(c) Availability of Findings and Statement of Overriding Considerations

Where findings or a statement of overriding considerations are required in accordance with Section 128.0312, the Planning Director shall make a draft available to the public and decision maker in accordance with Section 128.0310(c). Failure to provide this 14 calendar day review period shall not be treated as a procedural defect and shall not preclude discretionary action on the project.

§128.0313 Notice of Determination

The Planning Director, or City Clerk as appropriate for Process Five decisions, shall file a Notice of Determination within 5 working days of the date of final action for each project approval for which an environmental document was considered. §128.0314 Erroneous Information in Environmental Documents

(a) If the City Manager determines that an environmental document was certified based on erroneous information that was both material to, and had a substantial effect on, the findings and conclusions of the document and any related statement of overriding considerations, the City Manager shall determine the need for corrective action. If the City Manager determines that necessary corrective action cannot be taken in accordance with the provisions of CEQA and the State CEQA Guidelines, the permit revocation authority and procedures of Sections 121.0313 through 121.0316 shall be used.

(a) This section shall not apply if the information originally submitted was considered valid at the time of certification of the environmental document but later methodology establishes that the information is no longer valid.
